

Securing Your Web World

Real-Time Connections Demand **Real-Time Security**

Trend Micro™ Secure Communications Suite
stops threats fast—before they can strike

It's all about Time

Real-Time Communication and Collaboration

Email, instant messaging, and collaboration platforms connect your employees, partners, and customers. These tools strengthen ties and improve productivity, fueling business to grow at a faster pace. So let's make it secure.

Threats Strike Fast

Instant connections can also mean instant attack. Hackers continually look for new ways to enter your networks. In this real-time environment, they can spread malware, hijack systems, and steal data—in the blink of an eye.

Blended, multi-staged, and serial email attacks have grown more deceptive, often luring victims to visit spoofed sites or execute malicious code. Sophisticated attacks are also targeting IM and collaboration systems where activities like file sharing, chat, and blog posting add new vulnerabilities.

Instant Connections Need Instant Protections

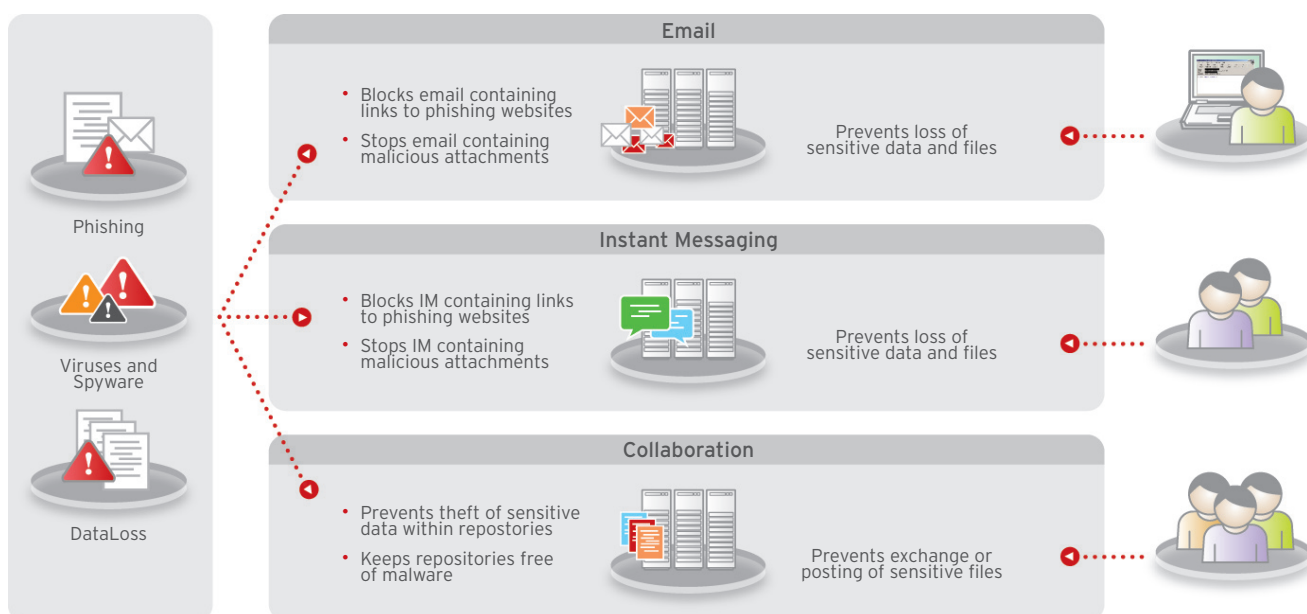

Trend Micro™ Secure Communications Suite protects your Microsoft® mail, IM and collaboration servers by stopping threats—fast—before they can strike.

Real-Time Risks

- Instant exposure
- Data theft
- Loss of productivity
- Damaged reputation
- Compliance violations
- Drained IT resources

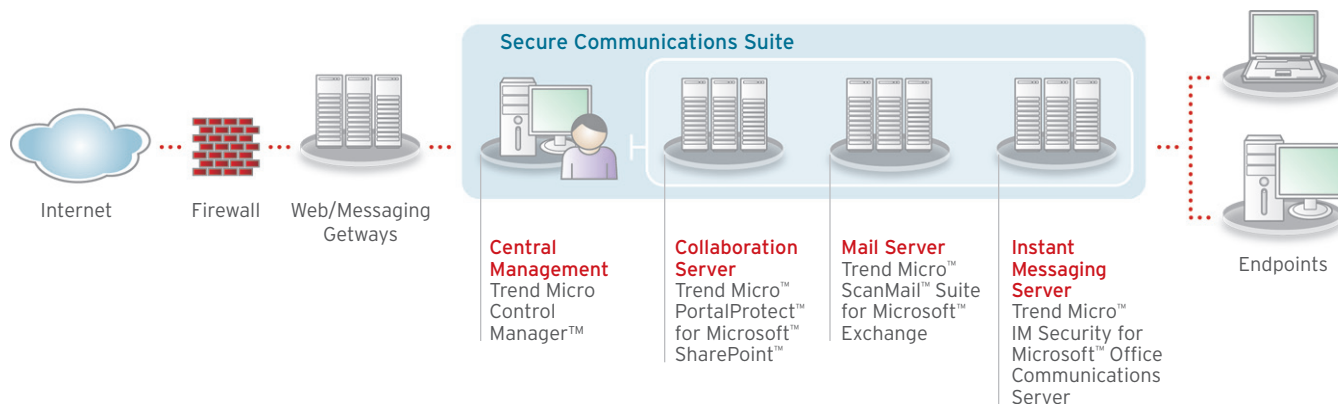

Threat Protections

- Spyware
- Phishing
- Pharming
- Viruses
- Worms
- Trojans
- Bot code
- Spam

The Power of Four: Secure Communications Suite

This 4-in-1 solution locks down all avenues of attack. And with centralized management, optimized performance, and tight platform integration, the suite reduces administration.

Key Features

Proactive, real-time protections work in concert with highly effective signature-based security to stop the wide range of threats. Together these technologies prevent data theft, infection, intrusion, reputation damage, and compliance violations.

In-the-Cloud Web Reputation

- Blocks IM that contains links to malicious sites—before they reach users
- Stops zero-day threats based on source reputation, like an instant background check

Award-Winning Antivirus Security

- Detects and blocks viruses, worms, and Trojans with real-time scanning
- Protects against zero-day threats using behavioral analysis

Advanced Spyware Protection

- Stops spyware, rootkits, and bot code before they can infect your PCs
- Thwarts multistage attacks that use spyware to steal data

Content Filtering & Data Leak Prevention

- Filters outgoing messages and files to prevent the loss of sensitive data
- Ensures a safe work environment by blocking offensive language

Leading Antispam

- Uses innovative techniques like image spam detection and URL inspection
- Blocks blended threats using real-time security, like in-the-cloud hash lists

Innovative Antiphishing

- Stops malicious email and IM that link to spoofed sites designed to steal data
- Leverages in-the-cloud web threat intelligence for immediate protection

Less Time on Defense. More Time to Act.

With Trend Micro Control Manager™, Secure Communications Suite simplifies security updates, threat response, and remote management across products. This means you have time to be proactive and optimize security.

All products in Secure Communications Suite minimize IT administration. As evidence of this, an independent study by Osterman Research found that ScanMail Suite requires half the admin time compared to mail server security solutions from Symantec® and Microsoft.¹

Secure Communications Suite	IM Security	ScanMail Suite	PortalProtect
Protection Point	IM Servers	Mail Servers	Collaboration Servers
Web Reputation	✓		
Antivirus	✓	✓	✓
Antispyware	✓	✓	✓
Antispam		✓	
Antiphishing	✓	✓	
Content Filtering & Data Leak Prevention	✓	✓	✓

Why Trend Micro?

Trend Micro Delivers the 5 Essentials for Enterprise Security

- Stops Threats Fast—Before They Can Strike.** Our Web Reputation uses real-time threat intelligence to block malicious links before they can be delivered. Plus, in-the-cloud spam protection and zero-day security stop new, unknown threats before signature updates are available.
- Who/What/How Analysis.** Who is the source, and can I trust them? What could be hidden in this message or file? How is it behaving? Secure Communications Suite identifies who, what, and how with innovative reputation, content, and behavior analysis.
- All-Threat Protection.** Trend Micro technologies stop the wide range of threats.
 - Web threats
 - Viruses & worms
 - Phishing & pharming
 - Data theft & loss
 - Spyware
 - Trojans
 - Spam & Bots
 - Inappropriate content
- Multilayered Security.** Today's deceptive threats attack every network entry point. Trend Micro secures your email, enterprise IM, and collaboration environments to protect your network, data, employees, partners, and customers.
- Ease of Management.** With the complexity of today's threat environment, security must be easy to manage. The suite's centralized management, optimized performance, and tight integration all contribute to low administration—so you have more time to be proactive.
